EDUCATION

Indian Institute of Information Technology, Kota

Bachelor of Technology in Electronics and Communication Engineering

Aug 2023 – Jul 2027

CGPA: 8.01/10.0 (Sem 1–6)

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, C++, Java

Frontend: HTML, CSS, React.js

Backend: Node.js, Express.js, REST API Development, JWT Authentication, Cookie-Based Authentication, MVC Architecture

Databases & Tools: MongoDB, MySQL, Database Design, Database Management, Git, GitHub, Postman, Render, VS Code

Core CS: Data Structures and Algorithms, Object-Oriented Programming

Embedded Systems: UAV Calibration,

Real-time Sensor Logging, GPR Signal Processing, Real-time Video Feed

EXPERIENCE

Project Intern – UAV and Embedded Systems

June 2025 - August 2025

Faculty-Led Research Project, IIIT Kota

On-site

- Engineered and calibrated a custom UAV for autonomous navigation, executing **15+** flight trials and maintaining **100%** stability in challenging conditions.
- Built a GPR-style embedded prototype; implemented real-time sensor data logging pipeline that improved detection accuracy by **15%**.
- Managed the procurement and integration of **5+** hardware components, ensuring the prototype was fully assembled and operational **2 weeks** ahead of the research deadline.

PROJECTS

URL Monitoring Web Application

<https://url-monitor-frontend.onrender.com>

Node.js, Express.js, MongoDB Atlas

- Built a full-stack URL monitoring application using **Node.js**, **Express.js**, and **MongoDB Atlas** with secure JWT-based **authentication** and persistent monitoring history.
- Developed RESTful APIs supporting user authentication, authorization, URL management, and efficient monitoring workflows.
- Implemented scheduled backend tasks using asynchronous patterns to manage **CRUD** operations for critical URL health checks.
- Designed backend logic to enforce per-user monitoring limits and improve system throughput.

Create-jr-backend (NPM CLI)

<https://www.npmjs.com/package/create-jr-express-backend>

Node.js, npm, JavaScript

- Developed and released an npm CLI package that scaffolds production-ready Express.js backend applications with a single command.
- Automated project initialization by generating folder structure, environment configuration, dependency installation, and reusable boilerplate code.
- Reduced backend project setup time from approximately 30 minutes to under one minute through automated scaffolding.
- Released the package on npm with public documentation and GitHub source code.

LEADERSHIP & RESPONSIBILITY

Club Coordinator

Aug 2025 – May 2026

ARC Robotics Club

IIIT Kota

- Led technical workshops on UAV development and embedded systems for **50+ students**, resulting in the assembly of **2+** custom UAVs optimized for long-range telemetry.
- Directed ongoing UAV projects targeting a **10–20 km** operational range by coordinating hardware, firmware, and telemetry integration across student contributors.
- Managed club resources, collaborated with faculty members, and supported technical planning for student-led UAV research initiatives.
